

Digital Mapping Planting Data

New feature for our patented Press Wheel and
Seed Sensing Technology Systems

Real time tracking with BSSI's in-cab and remote monitoring system

Operators can track their potato
planting performance in real time
and make necessary
adjustments on the go.

Record keeping made easy

Enhance your record keeping with
our new digital field mapping
feature that records measurements
in real time - updating every second.

11

Metrics
to Track

- Success Percent
- Average Spacing
- Target Spacing Deviation
- GPS Speed
- Wheel Speed
- Wheel Slip
- Population (per acre)
- Fertilizer Application Rate
- Furrow Temperature
- Air Temperature
- Seed Temperature

Universal integration for field management software

BSSI is working to have grower digital
map files universally transferrable to the
leading field management software
platforms for seamless and insightful
field data management practices.

AVAILABLE 2026

BSSI's Digital Mapping uses coloured polygons to
give at-a-glance information for the planting
metrics growers care about most.

Sample: Wheel Speed Data Digital Map

Certified AG Data Transparent

BSSI is a certified member of AG Data Transparent, giving
growers confidence in the privacy and security of their data
generated through BSSI products and services.
